Trans Marine Propulsion Systems, Inc. - Where the Solution Begins
[\(www.transmarine.org/\)](http://www.transmarine.org/)

Trans Marine Propulsion Systems, Inc. (TMPS) is a Seattle Washington based marine sales, service, engineering and vessel Management Company.

They required a website that would present their company to a broad range of industries, including ship owners, offshore operators, power plants, mechanical industries, and ship and engine builders all over the world.

Arestia Design Services (www.arestia.com) designed a complex informational website with Synapse.CS integration for content management and to provide Trans Marine a variety of management reporting tools.
